

HNC / HND Health and Social Care

Interview Task

As part of your course this year you will be expected to carry out research in your work placement, setting to identify an area of concern or an aspect of daily life that needs changing. You will then be expected to make plans for changes and put these plans into practice and evaluate the outcomes.

In order for us to establish your interest and commitment to the course you will be expected to complete the following task at your interview. You will be expected to discuss an issue that you have identified in one of your work experience placements and how you would change it. You will need to prepare some outline plans and be prepared to explain what steps you would take to ensure this change takes place with the minimum amount of disruption to the clients.

You may produce a power point if you wish but it is not essential. We are looking for ideas and evidence that you are able to approach this level of work. You will have 20 minutes allocated to this discussion and, following this, a question session.

If you require any further clarification of this task please contact Anji Golledge on 01424 458489.
